# Auto CLIA **CIA 1200**

Total Solution of Automatic  
Chemiluminescence  
Immunoassay Analyzer

Innovation For **Health**, Quality For **Life**

A female scientist with blonde hair tied back is shown from the chest up. She is wearing a white V-neck lab coat over a white shirt. She is wearing white gloves and holding a blue and silver pipette in her right hand, which is raised towards the top left of the frame. Her gaze is directed downwards and to the left, focused on her work. The background is a blurred laboratory environment with other equipment visible.

## **Streamlined Operating System Makes Work Easier**

Total Solution of Automatic  
Chemiluminescence  
Immunoassay Analyzer

Auto CLIA

# CIA1200

## Main Parameters

- Principle: Magnetic microbeads CLIA
- Throughput: 120 T/H
- Time to first result: < 15 min
- Sample tube size: 75mm/100mm
- Auto re-test: available
- Internal master curve, 2-point/6-point calibration
- Barcode scanning to identify and locate reagent/sample

# Professional & Leading

## CIA1200 Auto CLIA

### Advanced Detection Principle

CLIA(Magnetic solid phase separation)–Combination of magnetic solid phase technology and Chemiluminescence technology  
Wider linear range, higher sensitivity and test speed, fully meet the clinical need

### High Throughput, Short Assay Time

120 T/H, time to first result: 15mintutes

### Specially Designed Probe

Sidewall opening of the probe ensures the solid phase completely separate from the free phase

### Flexible Detection Mode

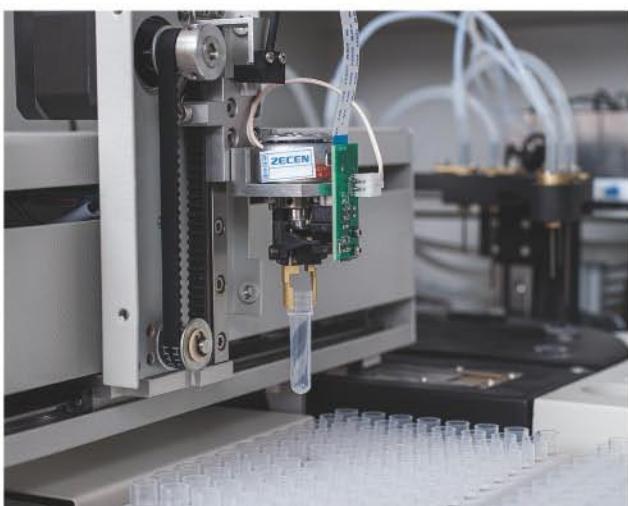

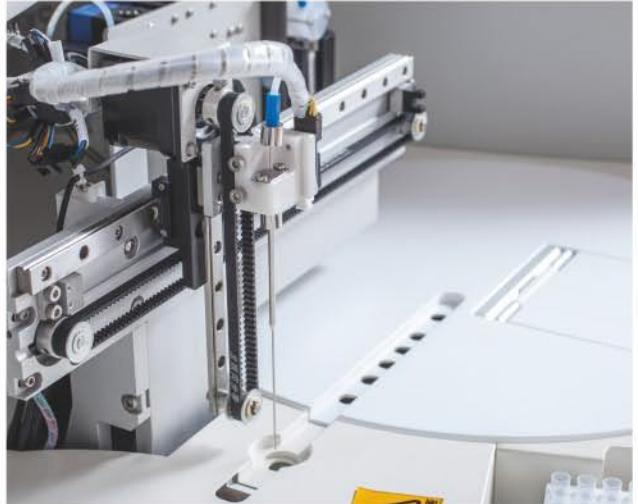

One-step, two step can be truly achieved, ensure the accuracy of the results

### Streamlined Operating System

User-friendly Interface, simple and convenient  
Intelligent Calibration&QC  
LIS connection  
Data editing, storage, query and printing

Innovation For **Health**, Quality For **Life**

**Intelligent and Precise Assay  
You Deserve It**

### Flexible Sample/Reagent Tray

- Flexible Sample/Reagent Tray
- Patented Sample/Reagent tray, simple mechanism, low failure rate
- Sample positions: 60, continuous loading
- Reagent positions: 20, Max 20 items can be tested one time
- Barcode scanning to identify the location of sample/reagent, avoid human error
- Reagent storage and expiration reminder, avoid waste
- Auto mixing for the magnetic beads reagent
- Refrigerated function, ensure best condition of sample/reagent STAT

### 4-hour Unattended Reaction tubes Loading Area

- Three-dimensional movement for mechanical finger, intelligent and efficient
- Move, load and discard the reaction tubes automatically
- Reaction tubes: 384 pcs, extendable
- 4-hour unattended operation

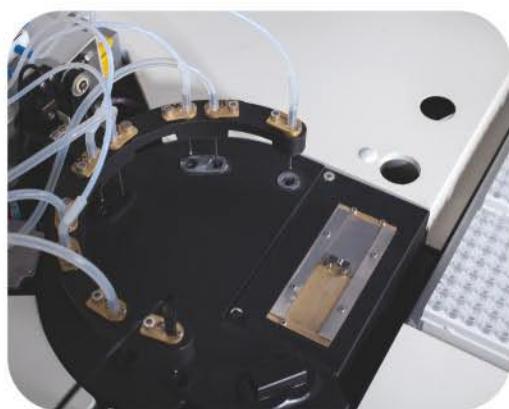

## High Precision Probe

- Sampling path moves in straight line, no throwing off
- Teflon coating, waterfall cleaning, low carry-over
- Anti-collision, clot detection, liquid detection

## Precise Temp-control Incubation Tray/Complete Separation Cleaning Tray

- Incubation tray:  $37 \pm 0.1^\circ \text{ C}$ , ensure complete reaction
- Cleaning tray: 4-step auto cleaning, completely separate the solid phase from the free phase

## Innovative FITC- Separation Technology by Magnetic Beads Binding with Anti- FITC

- Tubular chemiluminescence technology, Flexible
- Antibody and antigen reacts in liquid status, full time and complete reaction
- Only 5 minutes for magnetic beads involved in the reaction, avoid the non-specific adsorption
- Superparamagnetic beads, solid phase easily separates from free phase
- Strict process control, small intra-batch differences

## Innovative AP-APLS Chemiluminescence Technology

- High sensitivity, no less than  $10^{-21}$  per unit
- Innovative APLS substrate, fast reach plateau period
- Long plateau period, stable signal, easy detection
- Monocomponent non-oxidizing substrate, easy operation, long validity

## TEST MENU

## Thyroid

- Tt3
- FT3
- TT4
- FT4
- TSH
- TGAb
- TPOAb
- TG

## Glycometabolism &amp; Hypophyseal Hormone

- C-P
- INS
- hGH

## Fertility

- E2
- PROG
- TESTO
- PRL
- FSH
- LH
- Total-hCG $\beta$
- F-hCG $\beta$
- fE3

## Hepatic Fibrosis

- III NP
- CIV
- LN
- HA

## Tumor Markers

- AFP
- CEA
- FTN
- CA125
- CA15-3
- CA19-9
- CA50
- PSA
- fPSA
- SCC
- NSE
- HE4\*
- S100\*
- CA72-4\*
- CA242\*
- CYFRA21-1\*

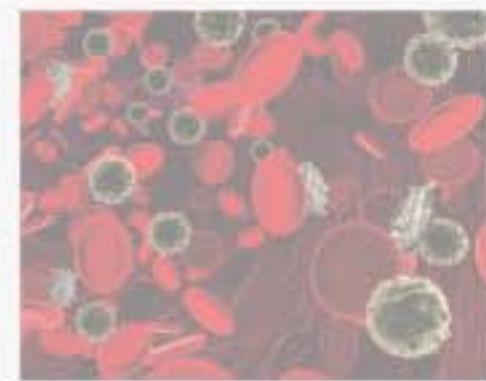

## Bone Metabolism

- 25-OH-Vit-D
- BGP
- iPTH

## Inflammation Monitoring

- PCT
- CRP

## Cardiac

- cTnI
- HFABP
- HCY
- NT-proBNP
- D-Dimer

## Kidney Function

- $\beta$  2-MG
- Cys-C
- RBP
- NGAL

## TORCH

- TOXO IgG \*
- TOXO IgM \*
- RV IgG \*
- RV IgM \*
- CMV IgG \*
- CMV IgM \*
- HSV-1 IgG \*
- HSV-1 IgM \*
- HSV-2 IgG \*
- HSV-2 IgM \*

## Infectious

- HBsAg \*
- HBsAb \*
- HBeAg \*
- HBeAb \*
- HBcAb \*
- Anti-HCV \*
- Anti-HIV \*
- Anti-TP \*

## Gastric Mucosa Function

- PG I
- PG II

- \* All Assays are includes Calibrator and Control Materials.
- \* All available Assays are CE Marked
- \* Assays with(\*) Marked Will be available on Dec, 2015
